

Get Ready, Get Set . . .

Part II

J. Clark Kelso
State Chief Information Officer
State of California
July 16, 2004

Mission for State IT

- The State will acquire, manage, develop and deploy its information technology resources to support responsive and cost-effective State operations and to establish timely and convenient delivery of State services, benefits, and information to the public.

Strategic Goals 2005-2010

- Smart Services
- Governance
- Organizational Capacity
- Secure Systems
- Shared Technology Services

Smart Services

- The State will achieve a user-focused, technology-enabled transformation in government operations to provide timely, convenient and responsive services, benefits and information to the public.

Governance

- The State will establish an information technology governance structure to promote (a) successful and relevant strategic planning and decision-making, (b) oversight and alignment of information technology projects and operations to ensure consistency with strategic policies, (c) operational implementation by those most directly responsible for program performance, and (d) visible and open coordination, oversight and accountability.

Organizational Capacity

- The State will aggressively develop its information technology workforce to meet the challenges of supporting a 21st century, public-sector organization.

Secure Systems

- The State will utilize information technology architectures and acquire appropriate technologies to secure its information technology systems.

Shared Technology Services

- The State will consolidate the procurement and management of common and enterprise-wide information technology infrastructures and applications serving the Executive Branch to improve operations and security at reduced cost, using the private sector as a model and benchmark for organization and competitiveness.

California Performance Review: Major Initiatives Already Underway

- Strategic Sourcing
- Data Center Consolidation
- Email Consolidation
